

6 September 1963

Addendum to 5 Sep 63 Memo for the Record on Section 45:

FROM: AD/BI

25X1A9a In connection with replacement of the [REDACTED] 25X1A12a  
[REDACTED] said he noted that DIA had an "Environmental Medicine"  
unit in the production center and wondered if this might be a  
source for production of the veterinary content of Section 45.  
I told him that in view of the demise of the cavalry, I doubted  
very much whether they had a veterinary competence to speak of,  
25X1A9a and that, if consulted, Dr. [REDACTED] undoubtedly would be not in  
favor of relying on this Military Medicine vestige to produce  
for the NIS in view of consistent experience over a period of  
years.
